DEVELOPMENT

企划与开发

根据市场需要严格开发
多道设计工序
为客户提供多样
时尚 实用 精致的包装

莱汇塑料包装有限公司，总部设在香港，并在广州成立工厂生产。配合不同地区的客户以提供服务，满足不同的要求。莱汇在国际社会的影响下不断成长，以谦逊勤勉的态度服务全球客户。

NICE PACKAGING LIMITED, Headquartered in Hong Kong and with manufacturing operations in Guangzhou, NICE serves its customers throughout the region and beyond. NICE is growing up in the influence of the international community,serving the global customers modestly and diligently.

作为一个全球性公民，莱汇尊重人权，对客户的知识产权持有高度责任感，负责产品的安全和品牌保护。莱汇荣获ISO900:2008认证并拥有无尘的生产车间。确保每件产品都安全、完整的交给客户，以令客户放心。

As a global citizen, NICE respects human rights, holds high sense of responsibility in protecting customers' intellectual property rights, Responsible for product safety and brand protection. NICE is awarded ISO 9001:2008 accreditations and have dust–free production workshop to ensure we can provide the safe and complete products to our customers.

莱汇公司拥有经验丰富的生产团队。我们的多语言销售团队使我们能提供一个客服对应一位客户的专案跟进、接触及解答，以满足客户的及时需求和不同的文化要求。

We have a production team with a wealth of experience. Our sales team who are capable of speaking several languages help to provide one–on–one customer services, following up customers' cases, keeping in contact with them and answering their questions. In this way, we can meet the requirements of customers of different culture timely.

我们深知彩妆容器对客户产品品牌形象的重要性,所以我们始终与客户保持一致。我们高度重视产品质量，无论设计、生产、检验与创新，都严格基于市场与客户要求出发。我们总是可以在短时间内实现客户要求，生产出一批高质量的彩妆包装产品。

We are well aware of the importance of cosmetic containers in customer's product brand and image. That's why we always keep pace with our customers. We attach great importance to product quality. Products are designed, produced, inspected and innovated according to the market and customers' requirements. NICE always can provide products with superior quality to customers as required.

莱汇产品注重整体时尚性，
无论从容器本身的外观到使用功能，
每个细节严格把关，
每个角度精心设计，体现非凡的品质。

Our products focus on the overall fashion. From the appearance of the container to the usage and function, we strictly control every detail. Every angle is elaborately designed,which embodies the extraordinary quality.

NICE PACKAGING adopts the internationally advanced manufacturing machine and testing equipments, first-class clean workshops with central air conditioning system, production environment has reached the international standard.

生产制成 严格按照计划和标准的生产制作流程进行生产和品控，确保出厂的每一件产品为优质合格产品。
Production: manufacturing and quality control are strictly in accordance with the plan of standard production process to ensure each product is qualified.

选对供应商
Selecting a Right Vendor

Q 供应商是否有适当的质量体系？
Does the supplier have quality systems in place?

A 我们广州的厂房已通过ISO 9001：2008认证，我们拥有无尘生产车间。
The Guangzhou plant has been awarded ISO 9001:2008 as well as dust-free workshop certificates.

Q 在这个行业里，你的竞争优势是什么？
What is your competitive advantage in your industry?

A 我们的团队富有理想，激情和经验。我们重视品质和客户的评价。
我们追求不断创新,客户至上，追求完美。
Our team is full of ideal, passion and experience.
We value the quality of our products and the comments from our customers.
We are in persistent pursuit of continuous innovation, customer-orientation and perfectness.

Q 供应商能满足从材料采购到生产不同类型的化妆品包材及最后组装等方面全方位的需求吗？
Can the supplier manage a full range of requirements from material sourcing to production of different kinds of cosmetic packaging & final assembly?

A 我们是一个一站式服务提供商，从概念到运输到本地和全球。
We are a one stop service provider, from the concept development to local & global shipments.

Q 供应商是否遵守人权、健康与安全、控制有毒物质和环境保护的国际标准？
Does the supplier adhere to international standards on human rights, health & safety, control of toxic materials, environmental protection?

A 我们已经实现了符合ROHS和实行符合SA8000社会责任国际标准的体系,正在实施ISO 9001:2008。
We've already achieved system that is in compliance with ROHS and SA8000 social responsibility international standard. We are now implementing ISO 9001:2008.

Q 热心助人，善于沟通，知识渊博这3点是如何成为沟通的关键？
How helpful, connectable and knowledgeable are the contact points?

A 我们建立了专门的沟通管理系统，以及一支在国际客服方面拥有平均7年经验的客服团队。
We have built a dedicated management system and customer service team with an average of 7 years of experience in serving international customers.

1 IQC:接到仓库送货单通知后，核对SIP资料对来料进行检验。
IQC: after receiving delivery note from the warehouse, check the SIP data and inspect incoming material.

2 IPQC:对生产前首件产品的的质量依据SIP进行外观/尺寸/功能的检验，合格确认生产。生产过程每3H/巡检外观，尺寸/功能一班次一次，并如实填写检验报表。
IPQC: inspect the appearance/size/function of the first article before producing according to the SIP quality standard, production only can be confirmed as long as the article is qualified. We check the appearance/size/function one shift every 3 hours and fill in the inspection forms according to the result.

3 OQC:所有包装OK后，再按AQL抽查，合格就可以出货，若不合格，则全面返工，返工后重新抽检直到大货合格后，方可出货。
OQC: when all the packing are ok, we do AQL selective inspection. The qualified will be arranged to be dispatched, otherwise they will be returned to rework. They can only be shipped until the sampling inspection of the mass production is okay.

Q&C
品质监测

7

1 影像测量仪
Image measurement instrument

高解析度CCD彩色摄像机，连续高倍物镜、以2维测量为主，精密检测产品用卡尺测量不到的或难以检测的各类尺寸，以投影的方式测试出来。可用它高效检测各种形状复杂工件的轮廓尺寸和表面现状。

CCD color camera with high resolution, which focus on constant high power objective and two dimentional measurement, will precisely measure all kind of size of products by way of projection that can not or difficultly be measured with callipers. It can be used to efficiently test overall dimentions and surface situation of complicated conponents in different shapes.

2 可程式恒温恒湿箱
Programmable constant temperature and humidity box

可程式恒温恒湿试验机具备模拟高温，低温，高低温交变，湿热等功能，对产品进行恒温恒湿测试，是目前众多生产和研发企业使用的重要方法，主要是检测产品在不同温湿度环境下的使用和储存性能，检测产品质量，提升产品品质。

Programmable constant temperature and humidity testing machine has the function of simulated high temperature, low temperature, high and low temperature alternating, muggy, etc. To do the constant temperature and humidity test for products is an important method for many production and research and development enterprises. It is mainly to test products' use and storage performance in different temperature and humidity environment, test the quality of the products and improve product quality.

3 真空测漏箱
Vacuum drying oven

真空箱就是将箱内的真空抽出去，使箱内产生负压，检测产品的密封性能在负压的情况下是否会漏液，产品是否合格。
真空干燥，主要是利用真空脱水，达到干燥的目的，可以检测在干燥的情况下再真空负压。

CVacuum chamber which pumps vacuum out of chamber to make it nagative pressure, is used to check whether products will leak or not under negative pressure. Vacuum drying which dewaters with vacuum and make it dry, is used to test presure bearing of products in dry circumstance.

4 对色灯箱
Color Assessment Cabinet

设备是标准的对色环境，从而保证产品在试样，生产过程中颜色的控制及验货的颜色品质。

The equipment is set with standard color–matching environment, to ensure color control during sampling and production and color quality when goods inspection.

5 数显式推、拉力仪
Digital display type push, pull instrument

产品组合的拉力测试，凡二个零部件组装之产品都涉及到拉力测试，测试拉力数据。
推力测试，根据产品需要二者组装时要求做推力测试。测试推入力数据。

Pulling force test product portfolio , all the products of two components assembled are related to the pulling force test, test the pulling force data.
Thrust test, according to the needs of the products when the two assembled is requiring thrust test. Test push force data.

6 电子天平
Electronic scales

精密测量产品的单重，容量。及单个产品有关的称重。

It is used to precisely measure weight and volume of products, as well as other relative weight of each goods.

7 盐雾测试机
Salt spray test machine

测试规定为各项金属产品及金属底材于电镀后、有机或无机涂装后等各项表面处理之盐水喷雾耐触性试验。测试是否会生锈及表面电镀、涂装是否会脱落。

Test for various metal products and metal substrate after electroplating, organic or inorganic coating and other surface treatment with salt spray resistance contact . To test whether the rust and surface electroplating, painting will fall off.

8 模拟运输振动试验机
Simulating transportation vibration testing machine

模拟产品包装之后测试在运输过程中因路途颠簸导致产品刮伤、碰伤。通过测试及早发现问题并有利于进一步改进产品的包装缺陷和功能。

After packaging, it will be used to make simulation test to check if goods will be scratched or damaged by jolt transportation. Test will help find problems early so that further improvement will be made to avoid poor packaging.

9 数显高度尺
Digimatic heitht gages

测量产品的高度、厚度尺寸及异形产品的高度、厚度尺寸。

It is used to measure height and thickness of products, as well as special–shaped products.

10 数显卡尺
Digital caliper

精密检测产品各零部件的尺寸。有效控制产品的质量，进一步控制及改进产品的质量稳定性。

It is used to measure dimentions of all conponents of products. It will help efficiently control goods quality and further control and improve quality steadiness.

RESPONSIBILITY
我们的责任

我们的第一责任是要对放心将产品交于我们生产的客户负责。
我们的产品必须保证高质量。
同时我们也必须不断努力地降低产品的成本以使客户获得最大利益。
我们接到的订单必须及时、安全并准确的完成。

Firstly, we are responsible for the customers who have confidence in us as
well as our products.
We must guarantee that our products are high quality.
In the mean time, we must try our best to deduce the product cost and strive
for the maximum benefit for our customers.
The orders received should be completed timely, safely and accurately.

我们的第二项职责是要对公司的员工负责。
必须让我们的员工对工作充满安全感。
薪酬福利必须保持公平、适当的原则，工作环境必须清洁安全。
每名合格的员工都有培训及晋升的机会，保证每个员工都能体现自己的价值。
Secondly, we are responsible for those who work for us.
Let our staff have sense of security while working.
In the aspect of salary and welfare, we insist to keep the fair and appropriate
principle. The working environment must be clean and safe.
The qualified staff should be given the opportunity for training and promotion,
ensuring that all of them can achieve their self–value.

我们的第三项职责是对我们的社会负责。
我们必须成为一个合格的全球企业公民，致力工作，并承担相应的税收。
我们必须珍惜并维护我们特有的资源。
Thirdly, we are responsible for the society.
We should try our best to be a qualified global citizen, devoting to our
work, and affording the corresponding taxes.
We should treasure and maintain our unique resources.

我们坚决尽自己最大的努力履行以上义务。
We will do our best to fulfill the above obligations.
